

# AWS-2901

Two level DIY indoor bike stand. The self-support main pillar telescopes up to your ceiling and stand firmly in place by using an inner spring. Light weight Alloy pole and bike cradle hook covered by soft rubber foam to protect your bikes. The cradles are adjustable and compatible to multi bike frames.

- ❶ Adjustment nut for height of hooks
- ❷ Quick release for fixing inner tube height
- ❸ Angle adjustable Alloy hook with soft rubber foam protection
- ❹ Steering wheel for fixing position
